RE: Inspection & Engineering Services  
Two (2) Elevated Water Tanks  
TEAM Proposal No. 10-090P

Gentlemen:

TEAM Consultants is an engineering firm that specializes in the inspection and engineering for aboveground storage tanks. TEAM has been in business since 1983. As an engineering firm, we do not perform repairs and/or repainting work. Therefore, we will not be bidding on any work resulting from our inspection and recommendations, nor will we be involved with or subcontracted by any contractor bidding the work.

I have been employed by TEAM Consultants since 1994. To my knowledge, there are no other firms in the state of Florida that are capable of performing detailed assessment inspections and developing repair specifications for elevated water storage tanks.

Should you have any questions, please do not hesitate to call us.

Sincerely,  
*Tank Engineering And Management Consultants, Inc.*

Jeff Kitchen  
Vice President
