Notes:

The Royals to be relocated are far larger than the other that we recently relocated. Cranes will be necessary to pull them and then to set them.

The cranes will need more than the width of one lane to set up. It will be necessary to close the road while the crane is operating in both the harvest and then the setting locations.

If this work is required to be performed at night, additional Overtime charges will apply.

The minimum ground space width necessary for planting for the Royals is 7' - 6".
Relocates carry no survival warranty whatsoever.
Dracaena will be the only additional plant that will be installed next to the ramp (48" O.C)
These prices do not include sale taxes. Please add sales taxes if applicable..

Specifications involving extra costs will be executed only upon written order, and will become an extra charge over and above the estimate
