TAB I

Summary

- Many economists attribute the relative weakness of economic data released during the first quarter to severe winter weather during the period. As temperatures warm, growth is expected to reaccelerate.
- First-quarter economic data was not weak enough to deter the Federal Reserve (Fed) from a third round of tapering asset purchases. At its meeting on March 19, the Fed reduced its monthly purchases of Treasuries and agency mortgage-backed securities by another \$10 billion to a revised total of \$55 billion per month.
- Geopolitical uncertainty caused by Russia’s annexation of the Crimean peninsula jeopardized growth in Europe and sparked a brief rally in U.S. Treasuries, which temporarily pushed yields lower. The markets quickly refocused on forward growth prospects and Fed action.

Economic Snapshot

- Fourth-quarter U.S. gross domestic product (GDP) expanded at a 2.6% annual pace, as consumer spending reached its highest level in three years. Slower-than-expected economic growth was attributed in part to the large amounts of ice and snow that blanketed the country for much of the winter. This was an improvement from the previous year, when GDP expanded by 2.0%.
- The U.S. employment situation continued to improve, as the economy created a monthly average of 182,000 new jobs in the first quarter, only slightly behind the 2013 average of 197,000. The unemployment rate has averaged 6.7% for the quarter.
- According to CoreLogic, prices for existing homes rose 12.2% year-over-year in February due to tighter supply. Although the housing market is still moving forward, sales and construction were slowed down by the winter weather.

Interest Rates

- During a press conference after the March 18-19 meeting of the Federal Open Market Committee (FOMC), Fed Chair Janet Yellen commented that the federal funds target rate could rise as soon as six months after the Fed completed its bond-buying program. However, Ms. Yellen softened her message at the end of the quarter, stating that the Fed would remain accommodative for “some time” to help those who are currently unemployed.
- The majority of FOMC participants indicated that 2015 is the appropriate time to begin increasing the federal funds target rate.
- Interest rates continued to normalize from record lows. The Treasury yield curve became more humped, as intermediate-term maturity yields rose, while short-term rates remained low and longer-maturity yields fell modestly.

Sector Performance

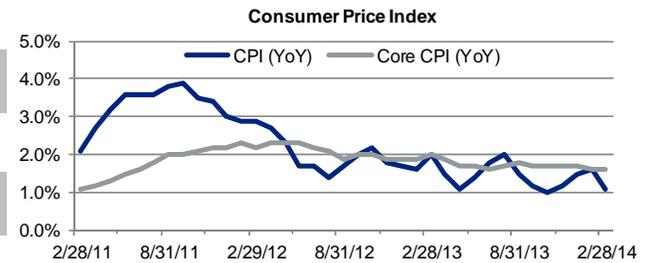

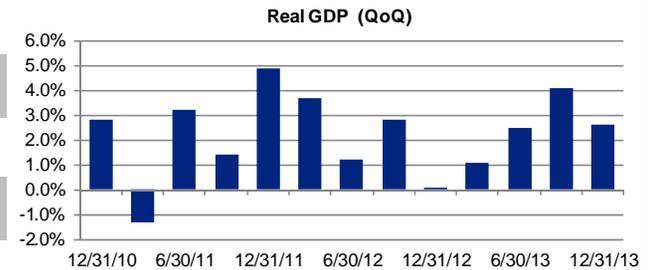

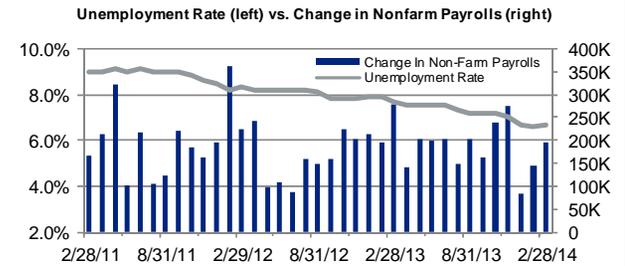

- Portfolios benefited from conservative duration management, as intermediate term yields surged after the March Fed meeting.
- Portfolios also benefited from the extra yield provided by holdings of corporate bonds, especially in the financial sector.
- Strong demand outpaced supply and continued to narrow yield spreads on corporate and municipal debt, which somewhat reduced their future attractiveness.

Economic Snapshot

Labor Market	Latest	Dec 2013	Mar 2013	
Unemployment Rate	Mar'14	6.7%	6.7%	7.5%
Change In Non-Farm Payrolls	Mar'14	192,000	84,000	141,000

TAB II

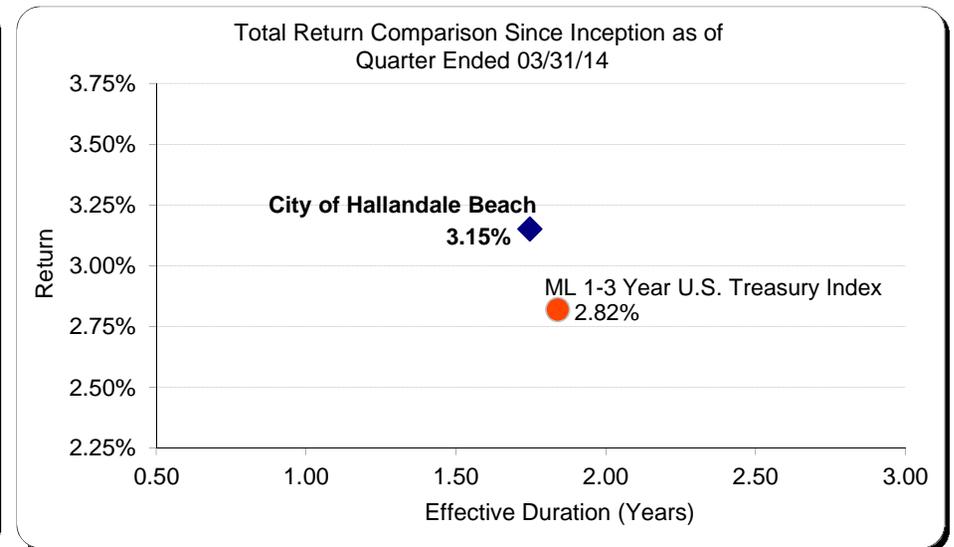

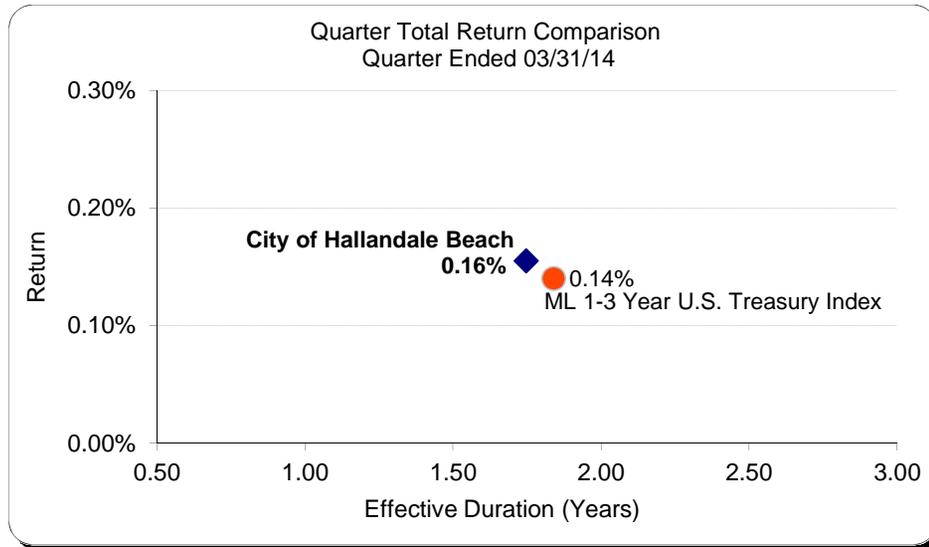

Executive Summary

PORTFOLIO STRATEGY

- The City's Investment Portfolio is of high credit quality and invested in U.S. Treasury, Federal Agency, high quality corporate, commercial paper, and municipal securities.
- PFM continued to actively manage the City's Portfolio during the first quarter and found value in the market, taking advantage of market inefficiencies or changes in economic outlook. As a result, the Portfolio realized \$47,717 in gains on sales (based on amortized cost) during the quarter. PFM is continually in the market monitoring for opportunities to add value to the Portfolio.
- The Investment Portfolio's quarterly total return performance was 0.16%, outperforming the benchmark's performance of 0.14% by 0.02%. Over the past year, the Portfolio earned 0.39%, versus 0.38% for the benchmark.
- The past 5 years is not a good roadmap for the next 5 years. During the past 5 years extraordinarily aggressive Fed policy has been driving bond prices higher. The advantage of holding bonds has been two-fold: interest earnings and positive price returns. As the FOMC exits their stimulus programs, the prices of bonds will almost assuredly move lower. In this transition period, the earnings advantage of holding bonds will need to be balanced against the disadvantage of periodic negative price returns.
- Investment strategies generally consist of two parts: strategic and tactical. These two parts reflect the fact that an investor's long-term evaluation of a market can be completely opposite to their short-term evaluation. Longer term PFM expects interest rates will normalize and move higher leading to capital losses, and thus our strategic plan is to keep the Portfolio's duration shorter relative to the benchmark's duration. In the near term, however, we may find periods of market quiescence when the steepness of the yield offers high rolldown return, and we will capitalize on these opportunities as they arise.
- With the end of the bull market in bonds and the beginning of the bear market, or at least the anticipation of a coming bear market, investment strategy has turned defensive. PFM looks to add value through superior timing of monthly extensions intra-month, and to mitigate market downturns via tactical underweighting of interest rate exposure.
- A sea change has arrived and we aim to steer the Portfolio safely between the shoals of under-investment on the one side, and the jagged rocks of over-investment on the other. Through prudence derived from experience and being diligent in monitoring research and market conditions we strive to optimize the balance between higher income return and smaller price declines. Safeguarding principal and purchasing power are our highest goals.

Investment Portfolio Performance

Total Portfolio Value¹		March 31, 2014	December 31, 2013				
	Market Value	\$43,775,291.83	\$43,707,503.09				
	Amortized Cost	\$43,772,725.50	\$43,664,095.89				
Total Return^{2,3,4}		Quarterly Return March 31, 2014	Last 6 Months	Last 12 Months	Last 2 Years	Last 7 Years	Since Inception December 31, 2005

State and/or Local Government Debt - General Obligation Bonds	207,286.71	0.27%		25%	YES
State and/or Local Government Debt - Revenue and Excise Tax Bonds	903,192.00	1.17%		10%	YES
Money Market Mutual Funds	6,990,831.26	9.08%		20%	YES
Intergovernmental Investment Pool	-	0.00%		25%	YES
Bank Accounts	23,235,219.09	30.19%		100%	YES

Notes:

- End of month trade-date amortized cost of portfolio holdings, including accrued interest.
- Managed by the City.
- The combined total of Federal Instrumentalities and Mortgage Backed Securities can not be more than 100%. The combined total as of March 31, 2014 is 6.05%.
- The Investment Policy does allow for Government and Federal Agency mortgage backed securities (MBS). Which is limited to GNMA, FHLMC, and FNMA mortgage backed securities. GNMA securities have the full faith and credit of the United States Treasury. As of September 6, 2008, FHLMC and FNMA have been under conservatorship with the United States Treasury. PFM has imposed an internal maximum allocation limit of 20% in MBS'. PFM will notify the City prior to adding MBS' to the portfolio.
