Background

One of the critical issues that the City of Hallandale Beach faces is flooding. To minimize the flooding nuisance along NW 7th Avenue, the City will be constructing a Drainage Improvement Project. In addition, it will include pavement restoration and markings, regrading and sodding of swales as necessary, sidewalk replacement, and new ADA compliant ramps.

Scope of Work

The improvements under this contract consist of site and civil work associated with the construction of new drainage structures and french drains. Once the new drainage structures are installed the City will mill and resurface portions of the roadway within the project limits. All work under this contract is within the City's right-of-way. The project improvement will be at the following location:

- Intersection of NW 7th Avenue from NW 3rd Court

Project Limits/Proposed Locations
