BACKGROUND: The City of Hallandale Beach owns, operates and maintains a wastewater collection and transmission system including lift stations, monitoring systems, gravity sewers and force mains. Wastewater is collected primarily from residential and commercial connections and pumped to the City of Hollywood’s Southern Regional Wastewater Treatment Plant for treatment and disposal. Fifteen (15) Lift Stations are owned, operated and maintained by the City.

In addition to the lift stations, the City maintains a network of 12 miles of force main and 57 miles of gravity sewer.

In an effort to most effectively fulfill its responsibilities, provide a high level of service to its residents and customers, accommodate growth and economic development, and protect public health, safety, and the environment, the City developed a Wastewater Master Plan in 2017. The Master Plan considered factors such as population growth, new development, aging of existing infrastructure, and new regulatory requirements. Based on recommendations of the Master Plan, the City has embarked on a program to address capacity and aging infrastructure issues of the existing transmission system. This includes upgrades at various lift stations as well as improvements to the force main network.

SCOPE OF WORK: The intent of the project is to rehabilitate and improve the City’s existing Lift Station #2 located at the intersection of Golden isles Drive and Diana Drive by replacing and upgrading mechanical and electrical equipment as well as replacing the existing emergency generator to improve system performance, increase system efficiency and reduce system maintenance.

PROJECT STATUS UPDATE: Administrative Notice to Proceed was issued on April 3rd, 2023 for the review and approval of shop drawings and procurement of materials and equipment required for the construction of the project. The construction commencement to be determined pending confirmation of long lead times for material and equipment procurement. Project is scheduled to be completed by March 2024.
