### Background

The City continues to reassess the city's current infrastructure picture, based on our findings during past and recent emergency response to infrastructure failure, we believe we need to immediately initiate as many projects for design as we can to engage in an effective rehabilitation strategy for the city.

### Scope of Work

The scope of work includes the replacement of an existing 8-inch water main (built in the 1960's) with a new 10-inch water main along Layne Boulevard. The water main replacement will extend from Hallandale Beach Boulevard/ S.R. 858 (to the north) to Holiday Drive (to the south), approximately 4,650 LF.

### Project Status Update

Pending formal Solicitation for Bids.

### Project Limits/Proposed Locations
